Thanks Jenny. I'm leaving the office today at 4 (b)(6) [REDACTED], so why don't we plan on connecting tomorrow? I should be at my desk all morning until 11, then again, after 1, so please feel free to call me whenever you're free.

Thanks!

Hey Emi – I got your voicemail and was just writing my to dos which also includes calling you. We've talked internally, so I can let you know where we are. It won't take too long. I thought it was a good conversation yesterday, so thanks also for all the work on your end.

I have a couple of meetings starting soon then won't be free until after 4pm. I'll either give you a call today or tomorrow to chat. And if I don't get you, I'll leave a voicemail and we can chat when you're free.

Re: the info below, I'll see what else is out there. Also, I have to talk with the modeler here on the VIC model, so I'll see what I find. Talk with you soon! - Jenny

Hi Jenny,

FWS brought up this study when I asked them about some of the therapeutic chemicals they use, and they mentioned that the preliminary results showed that no formalin was detected at their outfall. Information like that (that's specific to LNFH) is really useful for the BiOp, and I was wondering if you were able to find the report.

Thanks,

Emi

Hi Emi, here's the presentation I talked about on our call today. I'll plan on tracking down the report and can send it to you.

Safe travels!
